

FISHERIES CONSULTANT/POLICY ANALYST

TriNav Fisheries Consultants Inc. (TFC) is a professional fisheries and business consulting firm operating throughout Atlantic Canada and the Eastern Arctic. Specializing in the fisheries sector, our team includes experts in production efficiency, seafood market development, marine asset appraisals, fisheries science, policy analysis and strategic planning. We are looking for an individual with experience and knowledge of the Canadian commercial fishing industry. A strong understanding of the Northern Canadian Fishery, its policies and development prospects is also considered a strong asset. The successful candidate will work out of our Dartmouth, NS office.

The successful applicant will be responsible for:

- Preparing assessments and briefing notes related to new fisheries policies and developments, including quantifying their impacts on commercial fishery enterprises;
- Working directly with clients to develop strategic fisheries management plans and coordinate operational logistics;
- Facilitating community economic development in the North through fisheries and related activities, creating economic and socio-economic benefits;
- Liaising with industry stakeholders to coordinate scientific research endeavors and enact policy changes;
- Attending industry, government and/or stakeholder meetings and conferences;
- Conducting economic, business and scientific assessments for the commercial fishery and related sectors through literature reviews, independent research, stakeholder consultations, etc.;
- Leading consultations and research in the field with clients and stakeholders;
- Analyzing data, developing conclusions and authoring comprehensive reports;
- Presenting findings in appropriate and informative graphical and tabular forms for oral presentation and comment from clients and industry organizations;
- Assisting in proposal development and soliciting new business opportunities with prospective clients;
- Maintaining familiarity with relevant government programs and policies, current fisheries markets, and emerging industry issues that may impact on future business opportunities.

Preferred Requirements:

- Minimum of two years of experience working in a fisheries consulting and/or policy analysis role;
- Strong understanding of the commercial fishing industry;
- Familiarity with the indigenous and Northern Canadian commercial fishery sectors;
- A degree in a policy or management field is preferred but a relevant science degree (with fisheries specialization) will be considered;
- Possess excellent critical writing and analytical thinking skills;
- Comprehension of business and economic fundamentals related to the fishing industry;
- Strong knowledge (at a minimum) of Microsoft Office, especially Word, Excel and PowerPoint.

Resumes can be submitted through email at resumes@trina.com.

The deadline for applications is January 16th at 17:00 (ADT).
